Focused Sanitation Solutions for the RED MEAT INDUSTRY

BRAND PROTECTION
- Food Safety
- Operational Efficiency
- Reduced Cost-In-Use

Assure Program
We understand that ensuring your product stays safe is the foundation of your business. But we also know that efficiency and cost control drive your profitability.

- **Our SQF and HACCP Educated Food Safety Technicians** will partner with you to mitigate risk and stay on track with regulatory compliance while controlling costs.

- **Advanced Solutions**
  Complete portfolio of superior products and equipment designed for the Food and Beverage Processing Industry

- **Focused Expertise**
  SQF and HACCP Educated Food Safety Technicians design and support your sanitation and safety programs

- **Superior Service**
  Our team works to optimize your business – providing everything from in-plant service to GFSI Audit preparation and training.
Helping You Stay Compliant

We bring red meat industry experience, training and a service-oriented approach to your business, working closely with you to solve the most difficult challenges. Zep sanitation experts will partner with you to help improve your food quality and safety programs, train your team members on safe and effective sanitation procedures, and help you stay compliant with the ever-changing regulatory environment and customer audit mandates.

Chemical Management
• Audit for proper labeling of chemicals and feed lines
• Audit chemical cage

Equipment & Engineering Services
• Custom made chemical delivery and dilution systems
• Preventative maintenance on chemical feed equipment
Foam Cleaning/Descaling

Foam cleaning is a critical part of the daily sanitation program in food processing operations. Zep’s foam cleaners provide:

- Maximized chemical activity on soils and greases due to their superior formulation and increased contact time
- Visual reference to where the chemical has been applied
- Low levels of detergent usage to assist in wastewater management
- Easy rinsing of foam

**Food Surface Sanitizing**

Sanitizing food-contact and nonfood-contact surfaces after cleaning is critical to the safety of food being processed - both in food processing and preparation areas. Sanitizers are needed to reduce the number of harmful microorganisms, mold and yeast to an acceptable level. Because different types of sanitizers are needed for different surfaces, we can help you choose the ones that best meet your facility’s needs.

Preventing Cross-Contamination

Since pathogenic bacteria can easily spread from one area to another, cross-contamination is a major concern in food processing facilities. That’s why Zep provides quality direct intervention antimicrobials, sanitizing solutions, hand cleaner/sanitizers and entryway sanitizers to help you control the risk of cross-contamination and ensure food safety.

Protecting Your Brand

At Zep, safety is incorporated into everything we do and goes well beyond the products we produce. It extends to the safety of your employees, protection of the environment, and most importantly, the safety of your food products and your consumers. A successful food safety and sanitation program is the top priority of every food processing operation, and your local Zep Rep is prepared to support that effort. Your staff will benefit from Zep’s programs and systems that are custom-designed specifically for your facility to enhance your overall microbial control program. This kind of customer collaboration is the cornerstone of our success in the food industry.
